THE COMPANY.

Advanced Power Solutions Sdn. Bhd. (APS) was founded in September 2000 by a group of accomplished Malaysian engineers led by the late Dr. Salleh Huda Yusof.

The establishment of APS is to provide advanced power system solutions to the Asian Region power industry by transferring knowledge on power system engineering to its clients efficiently.

As the company grew, APS broadens its range of clients, executing its services internationally in countries such as Brazil, India, USA, Netherlands, Australia and Germany. Now, with a total of 18 employees, APS is a world-renowned corporation with a reputation as the leader in power system across the Asian Region.

WHAT WE DO.

We specialise in providing wide range solutions in network analysis, design, customised power system software, education and regulatory aspect of the electric power industry. Our state-of-art customised software solutions on power system analysis helps clients to be more proficient and effective.

Area of Business

The area of business of APS is divided into three main categories:

Consulting Services

Software and Hardware Solutions

Educational Programmes

Software and Hardware Solutions

Customised Software Solutions

Either automation on engineering process transformation flow or engineering specific solutions tailored for the clients’ need, our customised software solutions have established and proven to help various clients to solve problems efficiently.

Third Party Software and Hardware Solutions

Our collaboration with Siemens PTI and Manitoba HVDC Research Centre enables us to provide software and hardware solutions to clients either as provider or support solutions.

Educational Programme

Educational Solutions

Our popular classroom and training programmes on various topics related to power systems help in developing an abundant number of power engineers in the Asia-Pacific Region as well as African countries.

Consulting Services

Power System Solutions

Ranging from planning, operation, maintenance and events postmortem, our power system solutions through desktop simulations have proven to help power industry grow stronger over the years.

Design Solutions

Our design solutions, either equipment based or system design improvement, help the industry to be more competent while meeting the international and contemporary technology.

Regulatory Solutions

Our sound experience and knowledge in power systems equip us with the vision and technical ability that help our clients and utilities companies to develop standards, guidelines or codes for them to operate more diligently.

Technically, APS has a combined 65 years of experience in power system engineering. For a 15-year-old company, APS has certainly gained a lot of experience in dealing with several major companies around the world, such as:

- Siemens PTI (USA)
- Electranix Corp. (Canada)
- Powerforce APP (England)
- Powergrid Ltd. (Thailand)
- Tenaga Nasional Bhd. (Malaysia)
- Mitsubishi Research Institute (Japan)
- Sarawak Hydro Sdn. Bhd. (Malaysia)
- PT. PLN (Indonesia)
- Sarawak Energy Sdn. Bhd. (Malaysia)
- Sime Darby (Malaysia)
- Manitoba HVDC Research Centre (Canada)
- Sabah Electricity Sdn. Bhd. (Malaysia)
- Saudi Electricity Company (Saudi Arabia)

Working with these corporations has not only provided APS with valuable experience but also the opportunity to expand its expertise. APS has also played important roles on several occasions which are very noteworthy.

Here is a short list of APS’ accomplishments:

- Appointed as the independent investigator on TNB and SEB blackout incidents.
- Undertook to review the Malaysian Grid Code and Distribution Code.
- Performed a detailed system study on Power Evacuation for Bakun Hydro Power Plant to Peninsula Malaysia.
- Performed the Malaysia and Indonesia HVDC Interconnection Study.
Advanced Power Solutions Sdn. Bhd. (APS) is a consulting firm specialized in providing the electric power industry a wide-range of solutions in network analysis, design, customized software, education and regulatory aspect.
