

This program consists of 6 months full time training and another 6 months on the job training. During the first 6 months, participants will be paid an allowance of RM 3000. After the first 6 months of training, we will look for placement for the participants in a suitable electronics company to complete the following 6 months' on the job training.

This program is divided into 2 clusters:-

- Advanced Microelectronics
- Advanced Electronics Design

This is a public funded program.

Targeted participants:

- Malaysian fresh graduates with Degree in Electronics or equivalent

The objectives of this program is to:-

- Expand the talent pool of E&E engineers with the right skills
- Candidate to obtain industry relevant skillsets and better job opportunities
