GoodCore Software SDN BHD is a leading MSC-status software company in Malaysia that offers web-based application development, mobile app development (Android, iPhone/iPad apps), custom business software, custom portal development and much more. We boast a strong team of almost 100 (one hundred) software architects and developers across our Headquarters in Cyberjaya, Malaysia and a second Development Centre in Karachi, Pakistan.

Cutting-edge technologies such as .NET, PHP, Ruby on Rails, WordPress and Android, iPhone and Facebook application development expertise form a part of our potent development arsenal, allowing us to enrich the web experience like never before.

Our strength is to assist our clients right from the planning stage of software application and take them successfully through the stages of architecture, design, development, implementation backed by a very reliable on-going support.

The company has been engaged in delivering sophisticated large scale bespoke software solutions to our prestigious client across a variety of industries worldwide.

Mr. Altaf can be best described as a technology product strategist who can lead ideas and teams to very refined product plans and strategies. His art of surgically carving out opportunity from market needs and making it a profitable venture is what makes him the desired entrepreneur in this struggling global economy. He has extensive experience in defining and successfully launching bleeding edge technology products at several startup companies internationally. He has a strong flair for telecoms and is the founder of a successful telecom startup which spans 5 countries and boasts over a hundred strong employees.

He conceived and developed the idea of a patentable and award-winning (Internet Telephony 2011) Back-office Support System that defines and controls every aspect of a Class 4 switching aggregation operation. He was successful in securing a sizeable R&D grant from the Government of Malaysia to give the product “intelligence” such that it can independently make complex routing decisions based on various business and technical parameters.

His philanthropic contributions include founding of Robotics Labs, an institute focused towards spreading STEM education to the youth. Kids as young as 5 years old can learn futuristic technologies like Robotics, iOS Game Development, Programming, 3D Modeling, etc. He is also actively working to help visually impaired children be able to have education which is at par with the rest of the kids.

Mr. Altaf is on the board of directors of a few technology companies and continues to serve as an advisor to almost half a dozen companies. He holds a BS degree from University of Wisconsin Madison (USA) in Electrical Engineering (RF Design) and has worked in the Silicon Valley before starting his own ventures.
Mr. Hassan Basharat has been heavily involved in devising and delivering sophisticated software solutions since 1999 for clients worldwide. He has extensive experience advising companies to refine their software solution vision and setup successful software implementation and launch plans.

His area of expertise spans across several industries and his delivery experience spans across multiple continents. He has led numerous large scale software implementations from concept stage to successful rollouts and support. Some of the industries where Mr. Basharat has deep expertise include Finance, Education, Sports, Media, Real-Estate, and Online Gaming.

Before founding GoodCore, Mr. Basharat was an early core member of a startup in the financial trading space where he helped build multi-market, multi-currency equity trading systems. He worked with multiple stakeholders to define the product vision and then get it developed and launched in multiple international securities markets including the U.S., UK, Hong Kong, Singapore, Australia, amongst others. He also helped build a development and customer support team for on-going support of these systems.

Apart from running the operations of GoodCore Software SdnBhd as the Executive Director, Mr. Basharat is on the board of directors of a game development company focused on high quality casual games for mobile devices.

WEB APPLICATION DEVELOPMENT

Tapping the absolute cutting edge in web technologies, we can transform your idea into an impressive and practical working web application. And then, we can help you scale the application – both in terms of features and the support for a large number of users.

MOBILE APPLICATION DEVELOPMENT

We offer custom mobile application development on mobile operating platforms like iOS (iOS 4 and its later versions) and Android (2.2 – 3.1)

DESKTOP APPLICATION DEVELOPMENT

When you need to utilize the raw power of the desktop to achieve high interactivity for the end users of your application, there’s nothing that beats a quality desktop application.

CUSTOM SOFTWARE DEVELOPMENT

When businesses are looking for a software application that solves a problem unique to their organization, there’s nothing that beats a custom developed software application.

SOFTWARE INTEGRATION

Whether you need to integrate your CRM application with your accounting system, or your ERP with third party systems, GoodCore Software can provide you the guidance and development needed to successfully complete your integration project on time and on budget.

APPLICATION MAINTENANCE

Over the time, we have developed a software application maintenance process which takes into account the importance of critical business applications.
